

Sidewalk Work on Island Highway East and Weld Street

We wish to advise residents and businesses of our intended street work along the 100 block Island Highway East and Weld Street. The City will remove a total of three trees on the Island Highway East and no trees will be removed on Weld Street. This work will create a safer walking surface for pedestrians.

The work which is weather dependent is scheduled to begin on February 20 and is expected to take about two weeks to complete.

Located within the City sidewalks, the tree roots have lifted the sidewalk panels and have the potential to cause liability risks such as tripping hazards. It is necessary to remove the trees and resurface the sidewalk within our allowed budget.
