

## **Northwest Bay Road Closure Extended**

The twin corrugated steel pipe culverts at Craig Creek on Northwest Bay Road just west of Terrien Road at the City of Parksville's boundary are undergoing replacement. To facilitate this work, Northwest Bay Road has been closed to all traffic.

Please be advised Northwest Bay Road will not open tomorrow morning (August 20) as proposed last week by the contractor. Due to unforeseen factors beyond the City's control, the contractor has advised the City of new, unforeseeable circumstances that require a further extension to the road closure. As soon as detailed information regarding timelines becomes available, we will advise the public. Again, we sincerely apologize for this unexpected delay.

Once the road reopens for traffic, there will be single lane alternating traffic on Northwest Bay Road through September. Please expect delays during this period.

For more information please contact the engineering department at 250 951-2484 or [engineering@parksville.ca](mailto:engineering@parksville.ca).
